About Resha

Resha is an experience that transforms an individual's surroundings with pure, high-quality wooden products in an absolutely convenient manner. We help raise the elegance quotient for spaces where our wood is utilized. We also aim to ignite a sense of positivity and energy in areas where our wooden elements are applied, not to mention our commitment towards the environment.

Advantages of using wood for construction

- Contributes in locking CO2
- Excellent Insulator
- Biodegradable
- Sustainable

Introducing IPE

If great looking and long-lasting wood is something that your exteriors need, you cannot go wrong with IPE wood. Sourced from the forests of Brazil, IPE wood has become a popular choice for many households. However, nothing can compete with the original Resha IPE quality. Resha strongly recommends IPE wood for all quality-centric people who look to invest in durable products that liven the exteriors.

Why IPE?

- Unmatched colour and texture
- High durability and strength
- Class A fire rating
- Termite resistant
- Legally sourced
- Weatherproof
